

SUCCESSFUL IMPLEMENTATION AT NELSON MANDELA UNIVERSITY

During the month of February our "Intellimali Implementation Team" were in Port Elizabeth. The team led by Vuyokazi Mzamo and Sibongile Fuma were on hand to educate students about Intellicard's new "multi-purpose" pocket offering. Alongside the information sessions, the team assisted thousands of students to register their personal Intellicard and access their allowances. Our technical team visited all merchants, updated software on their systems and enhanced their point of sale capability too.

UNISA BOOK PROJECT GETS UNDERWAY

After a successful bid by Intellimali in 2018, the UNISA book allowance project got underway in early March. More than 70,000 students will receive their allowances through our Intellimali system during the course of the year.

Intellimali agents were stationed at each of the UNISA campuses to assist students. The students have been issued Starter Packs, which include Intellicards and the necessary information on how to register the card and access their allowance.

ITS CONFERENCE

The 32nd annual Integrator ITS User Group Conference took place at Century City Conference Centre, Cape Town from 11th -13th March 2019. The conference hosted more than 450 delegates from Universities, TVET Colleges and places of learning in Higher Education.

Stephen Meyer (Senior ICT Manager) had an opportunity to present our full suite of services to the audience. There was a great deal of interest in our closed loop payment administration system and the broader services of our collective group of companies – Student Funding Solutions.

DEVELOPING LEADERS FOR THE FUTURE

As part of our ongoing commitment to staff development, Intellimali commenced another “Supervisors Development Forum” in March 2019. During this forum our staff will be exposed to some of the key responsibilities of a leader and supervisor. The modules that will be covered include understanding diversity, conflict mediation, effective delegation, planning and problem solving.

The programme is facilitated by Mark Volmink (Manager: Services)
